GOVERNMENT REVIEW.

No. D/2492 OF 1917.

OFFICE OF THE SURGEON-GENERAL WITH THE GOVERNMENT OF BOMBAY:

Poona, 17th September 1917.

From

THE HONOURABLE SURGEON-GENERAL
R. W. S. LYONS, M.D., K.H.P., I. M. S.,
Surgeon-General with the Government of Bombay;

To

THE SECRETARY TO GOVERNMENT,
General Department, Bombay.

Sir,

I have the honour to submit for the information of Government the Triennial Report of the Civil Hospitals and Dispensaries of the Bombay Presidency for the years 1914—1916. During the three years under review medical work in this Presidency was a good deal interfered with owing to the frequent changes of appointments rendered necessary by the surrender of Medical Officers and Subordinates for military duty. Since 1914, 43 Indian Medical Service Officers out of a sanctioned staff of 58 in the Civil Department were surrendered for military duty. Their places were filled temporarily by doubling up appointments of Indian Medical Service Officers where possible, by re-employing 6 retired Indian Medical Service Officers who returned to duty in India, by employing 7 Civil Medical Practitioners (missionaries and others) and by promoting Civil Assistant Surgeons to act as Civil Surgeons. Of the entire staff of 24 Military Assistant Surgeons, 23 were returned to military duty, their vacancies being filled by 2 retired Military Assistant Surgeons, 20 Civil Assistant Surgeons and 1 Sub-Assistant Surgeon. Twenty Civil Assistant Surgeons, out of a strength of 66, who volunteered for military duty, were given temporary commissions in the Indian Medical Service and 2 are employed as Assistant Surgeons at Basra and Jask. Besides these, 97 Civil Sub-Assistant Surgeons out of a strength of 516 were lent to the Military Department for duty in India and 21 more volunteered for and have gone on active service. Thirteen Sub-Assistant Surgeons were dismissed for refusing to fulfil their bond to go on military duty, in India, when required. The frequent changes which occurred were bad for medical progress, but notwithstanding these difficulties and others arising from the curtailment of expenditure within the narrowest possible limits, fair progress has been made during the past three years.

STATEMENT A.

Hospitals and Dispensaries.

2. The total number of institutions open at the beginning of the triennium was 742 which rose to 774 during the three years. The number of institutions coming under classes I to IV increased from 371 to 391. Of the 20 new dispensaries opened, 12 dispensaries, *viz.*, those at Ankola, Paud, Nargund Mundagri, Dahanu, Nawagam, Warah, Shiggaon, Hungund, Tadkeshwar, Sinjhoro and Diplo were established under the scheme for providing additional dispensaries in districts. Towards the construction of the Dispensary at Ankola, Mr. D. R. Balsarvala gave a donation of Rs. 4,000, and the entire cost of building the Dispensary at Dahanu was defrayed by Mr. Narotham Girdhar of Dahanu in commemoration of the Coronation Darbar. The establishment of 4 other dispensaries at Akalkuva, Khed, Badami and Jalalpore has also been sanctioned.

3. The following additions and improvements to hospitals have been made during the past three years:—

(1) The Wadia Home for Nurses at the J. J. Hospital was extended and connected by a covered way to the J. J. and Petit Hospitals. The

Soldiers' Wives' Home was provided with sanitary fittings and other minor additions were made to the hospital buildings.

(2) The quarters for the steward and the clerk at the Gokuldas Tejpal Hospital were completed and an isolation and observation ward was added to the hospital. In the hospital building the sanitary annexes were remodelled.

(3) The Alibag Civil Hospital was provided with a ceiling and the verandahs and floors of the police and male wards were paved with Shahabad stone.

(4) The Police and Medical wards and the Office of Satara Civil Hospital were re-roofed and provided with a teakwood ceiling.

(5) At the Bijapur Civil Hospital the walls of the isolation ward were plastered and water pipes were laid on to the hospital.

(6) At the Dharwar and Palanpur Civil Hospitals new operation rooms were provided.

(7) The old roof of the Kaira Civil Hospital was replaced by a Mangalore tiled one and 2 cells for insanes constructed.

(8) An electric installation was introduced in Ahmedabad Civil Hospital for electric lights and fans by private contributions at a cost of Rs. 12,000.

(9) At Karachi Civil Hospital the new quarters for Nurses were completed and occupied. Pending the building of the New Ophthalmic Ward, the hospital was provided with a temporary Ophthalmic out-patient shelter. An additional small kitchen for the war block was also provided. An electric installation was introduced and the buildings provided throughout with electric lights and fans.

(10) In order to provide accommodation at the Sassoon Hospitals, Poona, for 48 sick and wounded British Officers, an office and kit-room and an extension to the front verandah were added to the Jacob Sassoon Hospital, and a temporary kitchen erected for the use of European Civil patients, who have been transferred to the David Sassoon Wards. In both hospitals and in the Maternity and Nurses' quarters electric lights and fans have been provided, partly through the munificence of the Western India Turf Club and partly by Government.

(11) The new Civil Hospital at Mahabaleshvar has been completed and occupied. The new King Edward VII Memorial Civil Hospital at Sholapur which is nearing completion would have been opened this year, but for the war.

4. Owing to the financial stringency caused by the war only urgent new works could be carried out during the past two years and many important works, including the provision of maternity wards and wards for advanced cases of tuberculosis at Civil Hospitals, have been held over.

STATEMENT B.

5. The total number of patients treated during the year was 2,662,677 as compared with 2,552,467 in 1915 and 2,485,773 in 1914. The mean number treated during the triennium was 2,566,972 against 2,301,089, an increase of 265,883 or 11·46 per cent. The average annual number of in-patients treated during the past three years rose from 58,431 in 1911—1913 to 63,756 and that of out-patients from 2,241,699 to 2,503,213. The increase was shared by all classes of patients. The number of women seeking medical relief at hospitals and dispensaries as in-door and out-door patients rose from 519,288 in 1914 to 539,498 in 1915 and to 556,999 in 1916, a total of 1,615,785 against 1,439,198 in the previous triennium, an increase of 12·27 %.

6. The popularity of Civil Hospitals would be greatly enhanced by the provision of Maternity and Gynæcological wards and the addition of women Assistant Surgeons and Sub-Assistant Surgeons to the staffs of the hospitals. The increase in the numbers of men, women and children treated as in-door patients are 6·10 per cent., 16·26 per cent. and 13·51 per cent., respectively, against 5·77 per cent., 18·26 per cent. and 20·4 per cent. in the previous triennium, pointing to the continued popularity of hospital treatment among women and children.

7. The mean daily average attendance of in-door and out-door patients for the triennium was 3,502·6 and 22,642·4, respectively, against 3,252·1 and 20,108·7 for 1911—1913.

8. During the triennium under review the average number of in-door-patients discharged cured was 43,268 against 38,793 in 1911—1913. The average mortality for the period was 5,045 against 5,294 for 1911—1913. The ratio of deaths per cent. to total treated was 7·9 against 9·0 for the preceding triennial period.

9. The number of beds available rose from 6,518 in 1913 to 6,686 in 1916. During the past three years, 3 maternity wards for the poor were opened in the different parts of Bombay City through the exertions of Lady Willingdon, but with this exception little has been done towards providing for the hospital accommodation of the city which is at present totally inadequate to its requirements. Including the beds in the Arthur Road Infectious Diseases Hospital (450), there are only 1,557 beds available in Bombay Hospitals for a population of 979,445 or 1·58 per every 1,000 persons. If Bombay were provided for on the same scale as Glasgow, which in population and as a shipping and manufacturing centre it somewhat resembles, it would have 3,369 beds or 3·44 per 1,000 of population. The position is even worse than these figures represent as out of the 1,557 the only beds available for cases of accidents or sudden illness are those in St. George's Hospital (222), the J. J. Hospital (296) and the Gokuldas Tejpal Hospital (120)—in all 638. Owing to this want of hospital accommodation, the J. J. and Gokuldas Tejpal Hospitals are always overcrowded and it occasionally happens that a case of serious accident which cannot be taken in at one of these hospitals has to be sent to the other and the patient sometimes dies while being moved. Such occurrences are not due to want of care on the part of the staffs of the hospitals, who with the limited accommodation at their disposal do all that they can, but to the total inadequacy of the provision made. During the past 30 years no addition has been made to the number of medical and surgical beds in the hospitals available for the general public in Bombay. In the mofussil suitable accommodation is provided in Civil Hospitals and many dispensaries for general medical and surgical cases; but additional provision is urgently required for maternity patients at many of the Civil Hospitals and special wards for advanced cases of tuberculosis in the larger towns where this disease is prevalent.

10. Arrangements were made after war broke out at certain Civil Hospitals for the treatment of sick and wounded British Officers, Nursing Sisters and Indian Officers and Soldiers from overseas. During the years 1915 and 1916 350 sick and wounded Officers and Nurses were treated at the St. George's Hospital, Bombay. Most of the cases among Officers were serious surgical cases from East Africa and Mesopotamia. There was no fixed number of beds allotted at this hospital. All urgent cases were taken in, and on an average over 20 beds were constantly occupied. Owing to the very limited hospital accommodation provided in Bombay for the treatment of Indians it was found impossible to give any beds in existing hospitals for the treatment of serious cases among sick and wounded Indian Officers and Soldiers. To meet this want, the Lady Hardinge War Hospital was opened in the new Museum. In this hospital accommodation was provided for 200 sick and wounded Indian Officers and Soldiers and later the number of beds was increased to 350. During the three years under review 8,421 cases were treated in this hospital. In 1916 further accommodation was given in the Parel Laboratory for 300 British Convalescent Enteric cases, who were kept in a hospital opened in the Laboratory and examined for "carriers" before being discharged to their units. In this hospital 523 cases were examined up to 1st January 1917. The Sassoon Hospitals, Poona, undertook, when war broke out, the treatment of serious surgical cases among Indian Soldiers for whom 30 beds were set apart. Later a further call was made upon these hospitals and arrangements were made for the treatment of sick and wounded British Officers also, for whom 48 beds were reserved. During the year 1916 there were 287 Officers and 165 Indian Soldiers treated in these hospitals. In addition to receiving men direct from the front cases were sent to the hospitals from the neighbouring Military Hospitals for special operative treatment or

special nursing. Arrangements were also made in the Free Church Mission Hospital, Poona, for the treatment of sick and wounded Indian Soldiers for whom 50 beds were set apart but have hardly been utilized. At the Karachi Civil Hospital 24 beds were allotted in 1916 for British Officers. The hospital has treated 88 sick and wounded British Officers. The statistics of military cases treated are not included in this report as they are compiled by the Medical Department of the Army. The changes in staff which were rendered necessary and additional equipment supplied in connection with war work are dealt with under their respective headings.

Statements CI and CII.

11. The following tables show the principal diseases among the in-door and out-door patients treated during the triennial period under review and mortality among in-door patients :—

In-door.

Disease.	1914.		1915.		1916.		Mean for the triennium 1914—1916.		Mean for the triennium 1911—1913.

Injuries (General and Local) ...	169,038	173,914	174,646	173,533	152,365

12. *Cholera* furnished 4,396 cases against 6,422 in 1911—1913. These were mainly contributed by the epidemics of 1914 and 1916 which gave rise to 1,840 and 2,425 admissions respectively. They were mainly attributable to the spread of infection at and after the Pandharpur Fair. The disease was prevalent all over the Deccan and Konkan and in parts of Gujarat. The Deccan and Konkan gave 1,452 admissions and Gujarat 716. The measures taken to combat the epidemic were (1) disinfection of wells and other sources of water-supply, (2) the instruction of villagers and others in the methods to be adopted for looking after the sick, disinfection and general prophylaxis and (3) the distribution of Potassium Permanganate "treatments". Sir Leonard Rogers "treatments" of Potassium Permanganate are supplied by all Civil Surgeons free, when required by village and District Officers and have been favourably reported on.

13. *Dysentery and Diarrhœa* gave 278,770 admissions against 281,525 in the preceding triennial.

14. *Leprosy.*—The admissions during the past three years fell from 7,256 to 6,429.

15. *Malaria.*—The admissions for malaria in-door and out-door rose from 1,171,600 in 1911—1913 to 1,352,372. The incidence of malaria in 1916 was severe all over Sind owing to excessive rains and to the huge inundation of the Indus and canals opening from it. During the past three years quinine "treatments" worth $\frac{3}{4}$ of a lakh of rupees were sold to the public in malaria-stricken areas. During 1914, 38 Sub-Assistant Surgeons were deputed for anti-malarial duty in malarious districts. They treated 48,345 cases of malaria and also 17,866 cases of other diseases. During 1915 and 1916 owing to the large number of Sub-Assistant Surgeons lent for military duty, only 6 and 8 Sub-Assistant Surgeons, respectively, could be spared for duty in the most malarious parts in Sind. The numbers of cases of malaria treated by them during these two years were 9,665 and 10,898, respectively, in addition to cases of other diseases amounting to 9,094 in the two years.

16. *Small-pox.*—The total number of in-door and out-door cases of small-pox treated during the year 1916 was 1,506. Of these, 467 were un-vaccinated, 985 vaccinated in infancy, 13 vaccinated in later life and 19 vaccinated after infection. The vaccinal condition was not known in 22 cases. The total number of cases of small-pox for the three years under review was 2,808 against 3,048 in 1911—1913.

17. *Tuberculosis* gave 35,524 admissions against 36,629 in 1911—1913. The scheme for providing wards in Civil Hospitals and out-door dispensaries in towns for the treatment of cases of tuberculosis had, unfortunately, to be deferred owing to the financial situation. In order to spread the knowledge of the infectiousness of the disease and of the probability of its cure when it is treated in its early stages, steps have been taken to have instruction given to school teachers and children regarding the danger of infection by tuberculosis and the general precaution to be observed, and a scheme has been drawn up in connection with the management of tuberculosis dispensaries for the spread of sanitary knowledge among the general public through the agency of the Dispensary Medical Officer, Nurses, Sanitary Instructors and Health Visitors. Lectures and magic lantern demonstrations in connection with tuberculosis have been given by the Director, Bombay Bacteriological Laboratory, in Bombay and at the Health Exhibition, Surat. Similar lectures and demonstrations have also been given by the Medical Officers of the District Sanitary Associations of Dharwar and Bijapur. The King George V Anti-Tuberculosis League, Bombay, are doing much to spread information regarding tuberculosis and its prevention, by means of lectures, demonstrations and an admirably equipped museum which includes diagrams, models and specimens of every sort of sanitary equipment for combating the disease. Notwithstanding all that is being done to enlighten the public the progress made is slight owing to the apathy which exists regarding the disease, the infectiousness and danger of which are but little realized, consumption being looked upon generally as a matter of luck and unavoidable.

18. *Labour cases.*—The admissions of labour cases show a very large increase. There were 18,296 admissions during the past three years against 10,257 in the preceding triennium—an increase of 78·36 per cent. The distribution of the increase is as follows :—Konkan (including Bombay City) 5,422, Gujarat 1,154, Deccan 871 and Sind 592. The rise indicates the popularity of maternity wards and it is believed that a much higher increase will take place in the number of cases treated when it is possible to provide a nursed maternity ward in each of the Civil Hospitals and in the dispensaries of towns of 10,000 inhabitants and over.

19. *Venereal diseases.*—The admissions for these diseases numbered 91,730 during the triennial period under review. The prevalence of venereal diseases and the provision of facilities for their treatment is engaging the attention of Government.

20. *Injuries, Local and General*, furnished 543,400 admissions against 481,590 in the preceding triennium. The increase is due to the introduction of mechanical appliances of all sorts consequent on the industrial growth of the country.

21. *Serum Therapy.*—Vaccines and sera continue to be used in suitable cases and have proved generally successful. Vaccines for the prevention of plague, cholera, typhoid and para-typhoid fevers, etc., have been supplied by the Director, Bombay Bacteriological Laboratory, for both Civil and Military uses on a scale much in excess of any previous calls on the Laboratory.

STATEMENTS DI and DII.

22. The admissions at Police, Canal, Forest and other State Special Institutions rose from 47,221 in 1914 to 47,594 in 1915, and 63,533 in 1916. The average during the triennium was 49,450 against 48,720 in 1911—1913. The increase is due to a large number (27,714) of cases of malaria admitted during the past three years.

23. The total number of patients treated at Railway Hospitals and Dispensaries rose from 202,845 in 1914 to 219,228 in 1915 and 231,360 in 1916, the average for the triennium being 217,811 against 187,594 for the previous triennium. The increase is mainly due to the opening of two new dispensaries and to the larger number of work-people employed on railway works.

STATEMENT E.

24. The total number of in-door and out-door patients treated at private non-aided institutions during 1916 was 1,957,385 as compared with 2,010,395 in 1915 and 2,046,198 in 1914. The average number for the triennium was 2,004,659 against 1,987,655 for 1911—1913.

STATEMENT F.

25. Of the patients treated during (1916) 19,098 were Europeans and Eurasians, 1,693,916 were Hindus, 795,002 were Mussalmans and 154,661 belonged to other classes.

26. During the triennial period under report there were on an average 19,342 Europeans and Eurasians treated against 17,312; Hindus 1,636,381 against 1,494,916; Mussalmans 768,393 against 670,832; and others 142,857 against 133,403.

27. The attendance at Women's Hospitals and Dispensaries has been steadily increasing. The number of patients treated has risen from 85,898 in 1914 to 94,199 in 1915 and 111,317 in 1916. The average number treated was 97,138 against 70,220 in 1911—1913. During the triennium under review the number of Women's Hospitals and Dispensaries increased from 9 to 15. The need for the provision of women doctors in hospitals and for the establishment of special institutions for the treatment of women and children by women doctors is recognised, but the scheme for establishing these had to be deferred owing to the war. A Woman Sub-Assistant Surgeon has, however, been appointed to Hyderabad Civil Hospital, Sind.

STATEMENT G.

28. During the year (1916) 108,320 surgical operations were performed on 107,259 persons with a mortality of 0·57 per cent. The mean number of surgical operations performed during the triennial period was 103,870 against 96,815 in the previous triennium. The average number of persons operated on during the past three years was 103,093 with a mortality of 0·48 per cent. as compared with 96,737 with a mortality of 0·52 per cent. during 1911—1913.

29. The removal of tumours and cyst in 1916 gave 1,488 operations with 8 deaths against 1,527 in 1915 and the same number in 1914 with 9 and 14 deaths, respectively. The mean number of these operations was 1,514 with 10 deaths against 1,536 with 13 deaths for 1911—1913. Four very big goiters of vascular growth about 6″ × 4″ × 4″ were removed successfully at the J. J. Hospital. At the Ahmednagar Civil Hospital a boy 14 years old was successfully operated on for Hydatid cyst which gave rise to enormous distension of the abdomen.

30. Amputations numbered 687 with 43 deaths as compared with 704 with 34 deaths in 1915 and 587 with 35 deaths in 1914. On an average 659 amputations were performed during 1914—1916 with 37 deaths as compared with 739 with 27 deaths in 1911—1913.

31. Operations on the eye numbered 6,769, of which 2,009 were for extraction of lens for cataract, as compared with 5,617 in 1915 and 5,043 in 1914. The average number of eye operations for the triennium was 5,810 against 5,305 for 1911—1913.

32. Vesical calculi was removed by litholapaxy and lithotrity in 942 cases with 13 deaths against 1,069 with 20 deaths in 1915 and 1,174 with 23 deaths in 1914. Lithotomy was resorted to in 299 cases with 41 deaths against 208 with 16 deaths in 1915 and 128 with 19 deaths in 1914. The mean number of operations for the removal of stone for the triennial period was 1,273 with 44 or 3·5 per cent. deaths against 1,387 with 36 or 2·6 per cent. deaths for 1911—1913. The increase in the number of deaths was due to the considerable mortality in the cases in which lithotomy was resorted to. In a case of Supra-pubic lithotomy at the Civil Hospital, Jalgaon, 16 stones, each conical in shape and more than $1\frac{1}{4}''$ in the long diameter and facetted were extracted along with one big oval parent stone, 2″ in the long diameter. The patient was a veritable quarry-of-stones which filled up the whole bladder. The patient made a slow but complete recovery. At the Sassoon Hospital a stone was removed supra-pubicly which weighed $12\frac{1}{2}$ ounces and the patient made a good recovery. In both cases there was serious cystites. Such cases are very rarely met with nowadays owing to the early diagnosis and removal of calculi by litholapaxy.

33. Abdominal operations other than those for diseases peculiar to women numbered 1,589 with 133 deaths against 1,626 with 106 deaths in 1915 and 1,620 with 137 deaths in 1914, while for diseases peculiar to women the numbers were 266 with 8 deaths as compared with 487 with 16 deaths in 1915 and 254 with 9 deaths in 1914. The mean number of abdominal operations other than those for diseases of women performed during the triennium was 1,612 with 125 deaths against 1,484 with 169 deaths in 1911—1913, while the number of those for diseases of women was 336 with 11 deaths as compared with 188 with 21 deaths for the previous triennium.

34. Operations for radical cure of Hernia numbered 364 with 13 deaths against 342 with 21 deaths in 1915 and 310 with 15 deaths in 1914, the mean for the triennium being 339 with 16 deaths against 259 with 31 deaths in 1911—1913.

35. Operations for abscess of the liver numbered 118 with 29 deaths against 93 with 19 deaths in 1915 and 130 with 30 deaths in 1914. The average number of operations for abscess of the liver was 114 with 26 deaths as compared with 146 with 41 deaths for the preceding triennium.

36. Obstetric operations numbered 1,244 with 54 deaths against 1,068 with 30 deaths in 1915 and 1,130 with 34 deaths in 1914. The average number of obstetric operations for 1914—1916 was 1,147 with 39 deaths against 917 with 33 deaths in 1911—1913.

37. Operations for conditions peculiar to women other than obstetric and abdominal numbered 908 with 5 deaths against 559 with 3 deaths in 1915 and 539 with 2 deaths in 1914, the mean number for the triennium being 669 with 3 deaths as compared with 624 with 3 deaths for the previous triennium.

38. There was a considerable increase during the triennium in the number of eye operations, abdominal operations other than those for diseases peculiar to women, abdominal operations for diseases peculiar to women, obstetric operations and operations for diseases of women. In all of these branches of Surgery, specialists were still working and the results are very good. There was a falling off, however, both in the number of operations and in the results of the more common operations performed at all hospitals such as amputations, operations for vesical calculi and for abscess of the liver. This was no doubt due to inexperience on the part of the Medical Officers who replaced Civil Surgeons surrendered for military duty. Operations for

the radical cure of Hernia, however, have increased in number and improved in results also.

STATEMENT H.

39. The total income exclusive of the cash balance amounted to Rs. 26,12,472 as compared with Rs. 25,52,279 in 1915 and Rs. 25,18,814 in 1914. Of the amount contributed in 1916 Rs. 2,90,317 were contributed by Local Boards and Rs. 5,22,356 by Municipalities. The interest on invested capital yielded Rs. 46,315. Subscriptions from Europeans and Indians amounted to Rs. 1,26,236. Miscellaneous receipts amounted to Rs. 3,77,794 of which Rs. 1,55,172 were realized on account of hospital fees and Rs. 1,21,939 were contributed by the several Nursing Associations.

40. The total expenditure amounted to Rs. 25,28,401 as compared with Rs. 25,55,543 expended in 1915 and Rs. 25,08,583 in 1914. Deducting from this Rs. 2,46,109 remitted into the treasury on account of hospital fees, sale-proceeds of unserviceable articles, etc., and Rs. 4,600 invested during the year, the net cost for 1916 was Rs. 22,77,552. The average cost of each diet was Re. 0-5-4.

41. The average annual income for the triennium under review rose from Rs. 22,21,352 to Rs. 25,61,142 of which Rs. 12,69,193 were contributed by Government and Rs. 7,72,641 from Local and Municipal Funds. The average annual expenditure for the period was Rs. 25,30,842 against Rs. 22,21,012 for 1911—1913. The mean percentage of cost borne by Government in 1914—1916 was 54·9 against 48·6 in 1911—1913. The average cost per patient during the triennium was the same as in the previous triennium, *viz.*, Re. 0-14-3.

STATEMENT J.

42. On 1st January 1916 the invested capital stood at Rs. 9,63,365. During the year Rs. 4,600 were invested, making a total of Rs. 9,67,965 at the close of the year.

GENERAL REMARKS.

43. *Medical Schools.*—The following table shows that at the close of the year there were 508 students attending the three Provincial Medical Schools:—

Class of Students.	B. J. Medical School, Poona.					B. J. Medical School, Ahmedabad.					Medical School Hyderabad, (Sind).					Total.
	4th year.	3rd year.	2nd year.	1st year.	Total.	4th year.	3rd year.	2nd year.	1st year.	Total.	4th year.	3rd year.	2nd year.	1st year.	Total.

Civil Medical Pupils ...	11	3	...	...	14	4	...	...	...	4	1	...	1	...	2	20
Free	1	1	1	5	8	...	1	1	...	2	...	...	...	1	1	11
Total ...	38	37	35	62	172	47	46	47	66	206	24	23	39	44	130	508

The scheme for employing private medical practitioners on the teaching staffs of the Poona and Ahmedabad Medical Schools has been working satisfactorily. In addition to their duties at the Medical Schools the medical practitioners continue to hold honorary appointments on the staffs of the associated hospitals and have rendered valuable assistance.

44. *Equipment of Hospitals.*—All the hospitals are fairly well equipped. The Western India Turf Club placed at the disposal of the Surgeon-General a donation of Rs. 36,737 for the improvement of the Presidency Hospitals treating military patients. Out of this sum, the Gerard Freeman-Thomas War Hospital, Bombay, and the Civil Hospitals, Poona and Karachi, were given additional surgical equipment for war work. Complete X-ray equipments with Coolidge tubes and the latest localizing improvements, etc., were supplied to the Lady Hardinge War Hospital, Bombay, Sassoon (Civil) Hospitals, Poona, and the Civil Hospital, Karachi. Rs. 13,000 were contributed

towards the electrical installation in the Sassoon Hospitals and Nurses' quarters, Poona, and Rs. 2,275 for the construction of a Band Stand in the hospital grounds which is also used as an out-door shelter by convalescent patients. In addition to the above, a sum of Rs. 56,000 was given by the late Mr. Ranchordas Vithaldas Shroff to be invested and the interest devoted to charitable work in connection with the J. J. and Gokuldas Tejpal Hospitals.

45. *Nursing Establishments.*—During the triennial period under review a Nursing Association was started at Sukkur. Owing to the numerous calls for funds which the war has made on the charitably disposed the several Nursing Associations have found it difficult to obtain the contributions required to maintain their full strength. The contributions have fallen from Rs. 1,30,322 in 1914 to Rs. 1,22,414 in 1915 and Rs. 1,21,939 in 1916. Since the outbreak of the war the Nursing Associations have supplied a large number of Nurses to War Hospitals, Hospital Ships and for the private nursing of sick and wounded Officers. The work these Nurses are doing is of incalculable benefit to the sick and injured, both Civil and Military, and it is most desirable that there should be no lack of funds for maintaining their numbers which are always short of the demand for their services. There is no way in which the charitably disposed can better assist the sick poor than by maintaining a full staff of well trained Nurses in the hospitals. The more advanced hospitals in the Presidency have now got nursing associations and are provided with nursing staffs, but Nursing Associations have not yet been formed in connection with the Civil Hospitals at Dhulia, Satara, Godhra, Kaira, Broach, Thana, Alibag, Ratnagiri, Karwar and Larkhana.

46. During the year 1916 the Edward VII Training Institution for Nurses and Midwives, Ahmedabad, endowed by the late Sardar Sir Chinubhai Madhavlal was completed and opened.

47. In conclusion I wish to bring to notice of Government the excellent work which has been done in the Lady Hardinge War Hospital by Dr. R. Row, M.D., Dr. Judah, M.D., Dr. S. R. Shirgaokar, M.D., Mr. V. N. Bhajekar, F.R.C.S., Mr. M. D. D. Gilder, F.R.C.S., Mr. G. V. Deshmuk, F.R.C.S., and Mr. D. N. Duggan, D.O. (Oxon.), who have given their services gratuitously and worked as Honorary Physicians and Surgeons under the Officer Commanding since the hospital was opened.

I have the honour to be,
Sir,
Your most obedient servant,

R. W. S. LYONS, M.D.,
Surgeon General, I.M.S.,
Surgeon General with the Government of Bombay.

APPENDIX I.

CIVIL HOSPITAL AND DISPENSARY STATISTICS.

STATEMENT A.

Showing the number of Civil Hospitals and Dispensaries in the Bombay Presidency during the year 1916.

[Total Population of the Province—27,034,317.]

Class of Civil Hospital and Dispensary.	Number open on 31st December 1915.	Number opened during the year 1916.	Number closed during the year 1916.	Number open on the last day of the year 1916.	Remarks.
1	2	3	4	5	6
I.—State—Public ...	51	...	...	51	
II.—State—Special—					
(i) Police ...	5	...	(*a*) 1	4	(*a*) The Police Training School Dispensary Násik.
(ii) Forests and Surveys ...	1	(*b*) 1	...	2	(*b*) Akola Dangs Travelling Dispensary.
(iii) Canals ...	5	...	...	5	
(iv) Others ...	15	...	...	15	
III.—Local and Municipal Funds ...	291	(*c*) 6	(*d*) 1	296	(*c*) Shiggaon Dispensary in Dhárwár District, Hungund in Bijápur District, Tadkeshwar in Surat District, Sinjhoro in Nawabshah District and Diplo in Thar and Parkar District, and Municipal Female Dispensary, Sukkar.
IV.—Private—Aided ...	18	...	...	18	(*d*) Rajana Jalooji Dispensary in Bombay City.
					(*e*) 1 each in Poona and Sátára Districts, 1 each in Sátára, Bijápur and Surat Agencies, and 16 in Káthiáwár.
V.—Private—Non-aided ...	337	(*e*) 21	(*f*) 25	333	(*f*) 7 in Palanpur Agency, 4 in Kolhapur and Southern Marátha Country, 2 each in Thána, Sholápur and Broach Districts, and 1 each in Ratnágiri, Ahmednagar, Surat, Kaira, Ahmedabad and Aden Districts, and Kaira and Cutch Agencies.
VI.—Railways ...	48	(*g*) 3	(*h*) 1	50	(*g*) Railway Dispensaries, Pachora, Jamner and Dhola Junction.
					(*h*) Railway Dispensary, Dhuskheda.
Total ...	771	31	28	774	

CLASSES I AND II.—These include all institutions maintained by provincial funds and under Government management. The fact that an institution possesses endowments or receives contributions from local funds or private subscriptions has not been regarded as a reason for not classing it as 'State' when provincial and imperial funds are practically responsible for all the charges connected with it. Class I—'Public' are State Dispensaries which are open to the poorer classes of the public. Class II are State Dispensaries which serve only a special section of the public as indicated in the sub-classification attached.

CLASS III.—Local fund dispensaries include all institutions which are vested in local boards or municipalities or guaranteed or maintained by local or municipal funds. The fact that such an institution is aided by private subscriptions, or receives assistance from Government in the shape of part of the salary of the medical officer, grants of medicine, or otherwise, has not been regarded as a reason for not classing it as a local fund dispensary, when its existence is practically dependent upon local funds.

CLASS IV.—Comprises institutions supported by private subscriptions or guarantee, but receiving aid from Government or local funds.

CLASS V.—Comprises institutions maintained entirely at the cost of private individuals or associations. The fact that Government supplies superior inspection or registers has not been regarded as a reason for not treating it as a private non-aided dispensary.

CLASS VI.—Comprises all railway dispensaries, whether maintained by State railways or others.

BOMBAY: PRINTED AT THE GOVERNMENT CENTRAL PRESS:

Annual Reports.—

Triennial report on civil hospitals and dispensaries in the Bombay Presidency for the years 1914, 1915, 1916.

GOVERNMENT OF BOMBAY.

GENERAL DEPARTMENT.

Resolution no. 7803.

Bombay Castle, 6th November 1917.

Letter from the Surgeon General with the Government of Bombay, no. D.—2641, dated the 11th October 1917 : —

"I have the honour to forward the triennial report on the civil hospitals and dispensaries of the Bombay Presidency for the years 1914—1916 and to state, for the information of Government, that there is nothing in it, the immediate publication of which can be considered of doubtful expediency."

RESOLUTION.—During the triennium 1914—1916 there was an increase in the number of medical institutions, open to the public in the Bombay Presidency, from 742 to 744, including 20 newly established dispensaries in the districts in pursuance of the policy of extending medical facilities in rural areas. This increase, although somewhat less than in the preceding triennium, is in the opinion of His Excellency the Governor in Council a matter for gratification in view of the very heavy demands made by the war upon the medical services and the financial stringency that has prevailed since the outbreak of hostilities in August 1914.

2. The average number of patients treated annually in these institutions kept pace with the increase in the number of the latter, the figure rising from 2,301,089 to 2,566,972. All classes of patients are reported to have shared in this increase, but it is a most satisfactory sign of the progress of medical relief among women that the numbers of female in-door and out-door patients showed a higher percentage of increase than that of male patients. The growing popularity of hospital treatment among women is the more remarkable in that the economic situation has made it impossible either to enlarge the number of maternity and gynæcological wards, or create a staff of women surgeons in the civil hospitals.

3. As in previous years, malaria was responsible for more admissions than any other disease and the figures under this head showed an increase of 15 per cent. over those of the previous triennium, rising from 1,171,600 to 1,352,372. This increase was mainly due to a very severe incidence of malarial fever in the province of Sind owing to excessive rains and an abnormal inundation of the Indus in the year 1916 and is not an indication that Government have in any way relaxed their efforts to combat the disease in the specially malarious tracts. Owing to the dearth of medical officers on account of the war some restriction was inevitable in the field covered by the sub-assistant surgeons detailed for this purpose, but a large number of cases was dealt with by them in the worst districts of Sind, while in spite of the increasing cost of the drug Government continued their policy of making quinine widely available in the form of special treatments. The value of quinine as a prophylactic against malaria has now become so universally recognised that in view of its enhanced price Government have recently resolved to increase the cost at which it is retailed to the public.

4. There is some cause for satisfaction in the reduction of tubercular cases admitted into hospitals, which had shown an alarming increase in the preceding year, but the Governor in Council regrets that he cannot regard this decrease as any evidence that progress has been made in arresting the spread of this insidious and deadly disease. The steps that are being widely taken to disseminate information regarding tuberculosis and to teach what precautions are necessary for its prevention are steps in the right direction, but no real advance can be made until the public rouse themselves from the

traditional apathy with which they are prone to regard it. It is a matter of deep regret to Government that the exigencies of the financial situation during the past three years have prevented them from giving effect to a scheme that has been prepared for providing tubercular wards in civil hospitals and out door dispensaries and of still deeper regret that not a single municipality in the presidency has responded to their invitation to establish an institution of its own for the treatment of this disease.

5. A more satisfactory feature of the period under review is the striking increase of nearly 80 per cent. in the number of labour cases admitted into hospitals, affording proof of the increasing popularity of maternity wards. The Governor in Council is confident that the provision of such wards in every hospital and large dispensary in the presidency will prove a most potent factor in reducing the enormous mortality among infants and women in child-birth and he hopes that at the conclusion of the war a scheme may be brought into operation for greatly increasing the number both of women doctors and of maternity institutions.

6. The average annual expenditure on hospitals and dispensaries rose from rather more than twenty-two lakhs to over twenty-five and a half lakhs, of which the Government contribution was approximately one-half, local and municipal funds being responsible for seven lakhs and three quarters. The average cost per patient remained at Re. 0-14-3.

7. The Governor in Council regrets that the many calls upon the public purse owing to the war prevented an increase in the number of nursing associations by more than one. He thoroughly endorses the tribute paid by the Surgeon General to the invaluable work done by these associations in supplying nurses to war hospitals and hospital ships and for private nursing. There are few objects of philanthropy more beneficial to the human race than the establishment and maintenance of institutions for providing nurses for the sick and suffering and His Excellency in Council trusts that the diminution in the totals of private contributions towards the upkeep of the nursing associations of this presidency during the past three years is due to temporary causes only and will be converted into a substantial increase as soon as the war is over. It is impossible to feel that the medical administration of this presidency is on a perfectly satisfactory footing until every civil hospital has connected with it one of these associations. The field of labour is practically unlimited and the scope for charity unbounded.

8. Financial stringency militated heavily against the carrying out of new works, and many important projects had to be held over, including schemes for the provision of increased maternity accommodation and special wards for tubercular cases in mofussil hospitals. It is however in the city of Bombay that the lack of sufficient hospital accommodation is most marked. The number of beds available in Bombay is only 1·58 for every thousand persons and this deficiency is liable, as the Surgeon General points out, through no fault of the hospital authorities to be attended with serious and sometimes fatal results when the inadequate provision existing makes it impossible for cases of dangerous accident to be taken in by the hospital to which they are first brought. Whilst Government are doing what they can to make good the deficiency both in Bombay and in the mofussil there is therefore still a wide field for private benefaction and charitable enterprise.

9. The war has made large demands upon the personnel and resources of the presidency and the response has been true to the fine traditions of the medical profession. The whole resources of the presidency have been placed at the disposal of the sick and wounded and no effort spared to alleviate their sufferings. His Excellency in Council has great pleasure in acknowledging the honorary services of Drs. Row, Judah and Shirgaokar, and Messrs. Bhajekar, Gilder, Deshmuk and Duggan in connection with the Lady Hardinge War Hospital and the devoted work of many other medical men, both official and non-official, throughout the presidency. The calling up of three-quarters of the Indian Medical Service and practically the whole of the Military Assistant Surgeon staff for military duty and the volunteering for active service of nearly one-third of the Civil Assistant Surgeons serving in the

presidency, as well as the loan to the military department of about 20 per cent. of the Civil Sub-Assistant Surgeons in addition to a number of volunteers from the same class imposed a very severe strain upon the staff remaining and the thanks of Government are due to the Surgeon General himself and his depleted staff for the very efficient administration of the medical department and the satisfactory progress that it has been able to record in a period of peculiar stress and difficulty.

G. A. THOMAS,
Secretary to Government.
